

Case

GET STARTED

Tringg Cars is an organization with an agency for the premier car brand 'Tes Motors' in Delhi. It has multiple showrooms in the city and sells all models of cars manufactured by 'Tes Motors'. Tringg Cars organizes a month-long car festival from July 16th to August 15th every year to celebrate Independence Day. During this period, the company offers multiple discounts across car models and categories.

OBJECTIVE

You are a newly hired data analyst at Tringg Cars. The General Manager (GM) has provided you with the data of car bookings for the quarter April-June. The GM wants you to analyze the booking trends across different fuel types, as he believes that the EV variants of cars are not performing well. He also wants you to analyze the data and prepare a booking-cancellation report to clearly show the trends across fuel types.

The GM wants you to help him develop a data-based discount strategy. He has asked you to suggest the cars and models on which discounts can be offered for the upcoming car festival. He wants to use a two-pronged discount strategy: first, to address the high cancellation trends in any of the fuel types, and second, to work across variants of all car models where the cancellation rates are high.

Data and Formatting

Booking Data Sheet provide details of booking and cancellation for the months April, May and June for each car models.

Reporting Format sheet for helping you in formatting reports and graphs

Booking Data								
Booking ID	Booking Date	Fuel Type	Car Model	Variant	Expected Delivery Date	Month of Booking	Transaction Date	Status
